## LATEST PROJECTS

### CollectionHub — [Github](#) - [Demo](#)

It is the all-in-one platform designed to help you organize your passions, share your discoveries, and connect with like-minded collectors!

- Create custom collections of movies, books, music, video games, or something else.
- Admins have access to all features of the app and can monitor other users.
- Add detailed information to each item in your collection, making finding exactly what you want easy.
- Like and comment on other users' collections and items.
- Search for specific collections, items, or comments.

#### Features

- State Management using **Zustand**.
- Navigation using **React Router**.
- **Full-Text Search** to find collections, items, or comments.
- Multi-language support using **i18next**.
- User Interface using **Chakra UI**.
- Form validation using **React Hook Form**.
- **Socket.io** to see new comments in real-time.
- **Axios** for retrieving and sending data from/to API.
- Promo slider using **SwiperJS**.
- Night Mode.

### CollectionHub Server — [Github](#)

The CollectionHub Server silently runs behind the scenes, acting as the brain of the CollectionHub client app. It's responsible for managing all users and collection data, ensuring a smooth and secure experience.

#### Features

- **Mongoose/MongoDB** for Database.
- **Express.js** as **Node.js** Framework.
- **Full-Text Search** to find collections, items, or comments using built-in MongoDB text search capabilities.
- **Socket.io** to keep comments for all users up to date.
- Authentication using **JWT**.

## SKILLS

- JavaScript & TypeScript
- React.js
- Redux & RTK / Zustand
- CSS Frameworks
- Rest API
- Node.js
- Express.js
- MongoDB/Mongoose
- HTML & CSS
- LESS
- Gulp
- Figma & Adobe Photoshop
